

Environmental Lead

Integrated Geomatics Inc. (IGI) has an immediate opening for an Environmental Lead based out of Grande Prairie, AB. IGI supports client development activities pairing survey and environmental services including planning, permitting, environmental assessment, GIS mapping and design and environmental monitoring. In this position, the successful applicant will be capable of planning and field scouting new development activities, possess a solid understanding of the Master Schedule of Standards and Conditions (MSSC), prepare daily reports, classify wetlands and watercourses, estimate timber salvage volumes, complete wildlife sweeps and coordinate field activities with clients. Candidates with an enthusiasm for business development and client engagement are preferred. This position is based out of Grande Prairie and will require daily communication with the Environment team in Calgary.

Responsibilities:

- Field scouting, data collection and reporting
- Regulatory planning and constraints assessment (MSSC)
- Conduct/coordinate environmental assessments and environmental monitoring programs
- Prepare environmental mitigation plans
- Interface with clients and regulatory agencies
- Classify wetlands and watercourses
- Complete wildlife sweeps
- Work closely with a multi-disciplinary team of technical experts

Qualifications:

- Previous environmental planning and/or construction experience for energy development activities
- Thorough understanding of the MSSC and how it applies to new development
- Excellent communication skills and high attention to detail
- Works well with others, a team player
- Self sufficient, organized and punctual
- Ability to travel and work in remote locations
