

## **Resource Analyst - Woodlands**

West Fraser offers a range of exciting career opportunities for individuals seeking challenging and rewarding careers. West Fraser Woodlands division located at one of our Alberta mills is recruiting for a **Resource Analyst**.

Reporting to the Senior Management Forester – Alberta, you will work closely with a team of professionals to support forest management plan (FMP) development and operational data analyses to support divisional priorities.

### **You'll Do:**

- Lead West Fraser's timber supply analysis work, including FMP submissions and tactical wood flow modeling
- Responsible for FMP timber supply analysis and associated non-timber assessments
- Collaborate with corporate and divisional staff on analytical needs including facilitating development of streamlined reporting to support operational needs
- Participate in the preparation of FMP technical documents, with focus on resource analysis components.
- Peer mentoring, liaising with government officials and contract management

### **You Have:**

- Five or more years of directly related experience.
- Understanding of forest management in Alberta and FMP requirements
- Extensive experience developing and running timber supply models
- Knowledge of Patchworks and Woodstock modelling platforms
- Experience in programming using SAS, Python, R and VBA
- Knowledge of GIS and spatial analysis, experience with ArcPro preferred
- A Master of Science in Forestry would be considered an asset
- Registered, or eligible for registration, as an RPF or RPFT with the Association of Alberta Forest Management Professionals.
- Self-motivated with strong written and verbal communication skills.
- Valid driver's license as occasional travel will be required throughout Alberta operations.

### **Compensation Package:**

- The salary range for this position may vary depending on experience, education, and location.
- Annual bonus opportunity
- Outstanding benefits package including medical, dental, pension, life insurance, disability, accident insurance, vacation, and holidays.

### **Your Workplace Location:**

Location of the position is flexible but would preferably be located at the office of one of West Fraser's woodlands operations in Alberta.

### **About Us:**

We make renewable, wood-based building products for the world, contributing to a more sustainable future. Today, West Fraser is one of the world's largest producers of sustainable wood-based building products, with more than 60 facilities in Canada, the United States, the United Kingdom, and Europe. From responsibly sourced and sustainably managed forest resources, West Fraser produces lumber, engineered wood products (oriented strand board, laminated veneer lumber, medium-density fibreboard, plywood, and particleboard), pulp, newsprint, wood chips, other residuals, and renewable energy. West Fraser's products are used in home construction, repair and remodeling, industrial applications, papers, tissue, and boxes.

What makes us stand out is our people-first approach. We value internal growth and continuous learning. Join us, and you'll enjoy competitive pay, great benefits, and an excellent pension plan, all in a supportive environment where your voice matters.

### **Diversity:**

At West Fraser, we strongly believe promoting diversity and inclusion is essential to our success. Our commitment to creating inclusive workplaces is reflected in our core values, and we constantly strive to foster a culture that values and respects every individual's unique background and perspective. By joining us, you will have the opportunity to be a part of a team dedicated to shaping a brighter future by embracing diversity and promoting inclusivity. Join our team at West Fraser and help us build a more diverse and inclusive community.

### **Sustainability:**

West Fraser is fully committed to sustainable forest management as defined in our environmental policy, reflected in every aspect of our work. We adopt new technologies and innovations to create exceptional building materials. Wood products are a natural, renewable, recyclable, and environmentally sustainable choice for consumers who prioritize sustainability.
